

# 5 Step Music Activities

## How To TEACH A SONG

Learning songs are fantastic ways for children to understand topics. This activity can be adapted for any simple song.

**01** Quietly introduce the song. For example, play it in the background when the pupils walk in. If some of them know it, ask them what it's about

**02**

Introduce actions. Make up your own, or use actions in the video. Begin to sing the song if you haven't already

**03**

Sing the song slowly without the music. Start by singing a line yourself and asking the pupils to repeat it back

**04**

Play the song back. Don't expect perfection, but be prepared stop it if not everyone is engaged

**05**

Challenge pupils to change the lyrics. Maybe split them into groups to do so. Get them to perform back
