

# 5 Step Music Activities

## MUSICAL SCAVENGER HUNT

Music can enhance storytelling, and can tell us characters are thinking and feeling. This activity helps students understand how music can create mood and atmosphere.

01

**Lay** out a selection of small hand-held instruments for the pupils to play with. Each pupil to describe the kind of sound they make

02

**Explain** the concept of a musical scavenger hunt. They will be hunting for different sounds and trying to record what they find

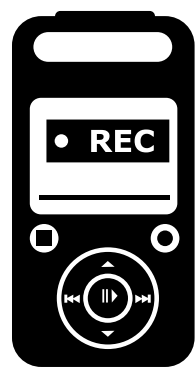

03

**Share** the musical list they need to find. Examples could be:  
A wind instrument  
Something that makes a 'ting' sound  
An appropriate drum beater  
A tambourine

04

Ask the pupils to **search** for the sounds on the list and record themselves making a sound with the instrument they find. They can use an iPad or any other recording device.

05

**In a circle** pupils will share the recordings of the instruments. The following questions can be explored:  
What was their favourite sound? How were the different sounds made?  
Was everyone's recording the same?
